

TELEMATIC SOLUTION FOR NON- MOTORISED GSE

WHAT IF YOUR GSE COULD TELL YOU

- ♦ where they are and have been
- ♦ if they're moving
- ♦ if they leave a certain area
- ♦ how long they have been used
- ♦ when maintenance is needed

Our GSE telematics solution for non-motorised GSE is a proven efficient and scalable solution for non-powered GSE management.

IT ALLOWS RENTAL CUSTOMERS TO TRACK IN REAL-TIME

- ♦ Find assets
- ♦ Monitor the fleet
- ♦ Alert & Geofencing

*Custom asset management
for optimal reporting
and GSE management*

TRACK

A low energy tracker (Stickntrack) is fixed to each GSE unit. **It is easy to install and is water, heat and shock resistant.**

The solution allows indoor trackability (e.g. garage, baggage hall).

The battery used on the tracker needs to be replaced only every 5 years and the Low Power Wide Area Network used for connectivity (Sigfox Network) ensures a cost efficient and scalable solution.

MANAGE

Get full control on your GSE fleet. The information collected through the tracker is accessible in a user friendly platform that can be personalised to your own needs. Choose when or how often you want to be updated on the status of your assets. Set up alarms and notifications for important status changes.

Find Assets

ASSET MAP

- ♦ Find the last-known location of the assets
- ♦ Assets are clustered together for improved visibility
- ♦ Different icons for moving/parked assets

1

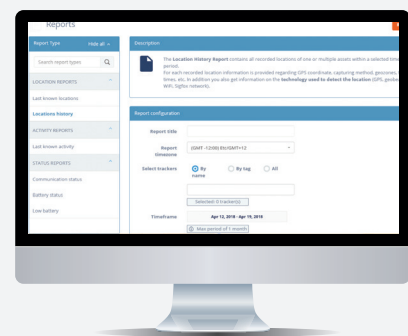

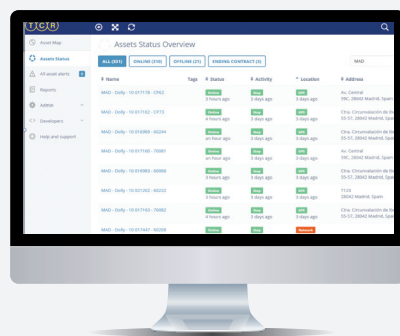

Monitor the fleet

INVENTORY VIEW

- ♦ Show the inventory in list view
- ♦ Quickly filter and find the assets

REPORTING

- ♦ Receive reports with last location, activity and other statistics

2

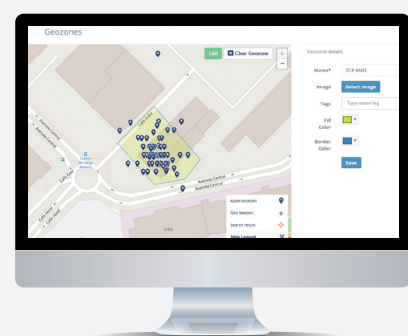

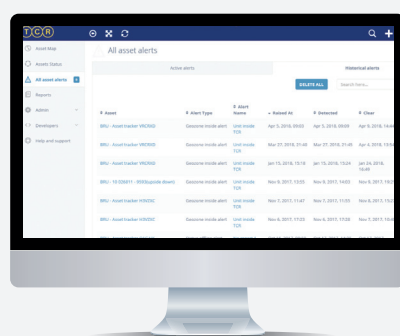

Alert & Geofencing

ALERTS

- ♦ Receive alerts when assets leave or enter a zone

GEOZONES

- ♦ Draw zones of interest on a map
- ♦ Quickly find assets based on geozones
